

Claims under Examination -- Xiong et al. (August 6, 2003) Appl'n Serial No. 09/541,462

- 1. (Amended) An isolated polynucleotide comprising a nucleic acid encoding ROC1, said nucleic acid selected from the group consisting of:
- (a) a nucleic acid consisting of the nucleotide sequence of SEQ IDNO:1;
- (b) a nucleic acid that hybridizes to the complement of the nucleic acid of (a) above under stringent conditions defined by a wash of 50% Formamide, 5X Denhardt's solution, 0.5% SDS and 1X SSPE at 42°C, wherein said nucleic acid encodes a protein that forms a complex with a cullin protein and/or has ubiquitin ligase activity;
- (c) a nucleic acid that differs from the nucleic acid of (a) or (b) above due to the degeneracy of the genetic code; and
- (d) a nucleic acid having at least 95% sequence identity to the nucleotide sequence of SEQ ID NO:1, wherein said nucleic acid encodes a protein that forms a complex with a cullin protein and/or has ubiquitin ligase activity.

Claim 2. (Canceled)

- 3. (Currently Amended) An isolated polynucleotide according to Claim 1, wherein said nucleic acid encodes a ROC1 protein consisting of the amino acid sequence given herein as **SEQ ID NO:2**.
- 4. (Currently Amended) An isolated polynucleotide according to Claim 1, wherein said nucleic acid consists of the nucleotide sequence given herein as **SEQ ID NO:1**.
- 5. (Previously Presented) An expression vector comprising an isolated polynucleotide according to Claim 1.

Claims under Examination Xiong et al. Appl'n Serial No. 09/541,462 Page 2 of 3

- 6. (Currently Amended) A cell comprising an expression vector according to Claim 5.
- 7. (Currently Amended) A cell comprising an expression vector according to Claim 6 and capable of expressing ROC1.

Claims 8-12 (Withdrawn)

- 13. (Currently Amended) An antisense oligonucleotide that is 8 to 50 nucleotides in length and is completely complementary to a portion of the nucleic acid encoding ROC1 of Claim 1.
- 14. (Currently Amended) The antisense oligonucleotide of Claim 13, wherein said oligonucleotide is DNA.
- 15. (Currently Amended) An expression vector encoding an antisense oligonucleotide according to Claim 13.
- 16. (Currently Amended) A method for producing a protein comprising the amino acid sequence of **SEQ ID NO:2**, or a fragment thereof, comprising
- (a) culturing a host cell comprising an expression vector comprising a polynucleotide comprising a nucleic acid selected from the group consisting of:
 - a nucleic acid consisting of the nucleotide sequence of SEQ ID NO:1;
 - (ii) a nucleic acid that differs from the nucleic acid of (i) above due to the degeneracy of the genetic code; and

Claims under Examination Xiong et al. Appl'n Serial No. 09/541,462 Page 3 of 3

- (iii) a segment of at least 60 nucleotides of the nucleic acid of (i) or (ii) above; and
- (b) recovering the protein from the host cell culture.

Claims 17-48 (Withdrawn)
